About Me

Hello! I'm Dominik Lenda. I am a psychological researcher and data analyst. But being disappointed with both, I'm changing my profession to a **cloud engineer**.

Age	26

Professional Skills

Work Experience

Principal Investigator at SWPS University, Faculty of Psychology in Wrocław

September, 2018 - September, 2021

Conducting a research grant project on cognitive underpinnings of experience-based choices, building statistical models and manipulating data in R, preparing computer-based experiments in Python.

Data Analyst at Statistical Emergency

March, 2020 - Present

Programming in R, preparing statistical models, applying statistical inference in Bayesian and frequentist methodology, writing reports of data analysis for scientific publications, contacting clients.

Junior Web Developer at Curate Science

December, 2019 - January, 2021

Web application development with HTML, CSS, JavaScript, and React; web scrapping metadata of scientific journals using Python, BeautifulSoup, and Scrapy.

Education

Masters in Experimental Psychology from SWPS University, Faculty of Psychology in Wrocław

2014 - 2019

I chose psychological studies because I was curious about the inner workings of human cognitive systems. After a while, I developed a passion for science in general. However, the lack of systematic approaches in the development of psychological theories and other problems in psychological science, such as shaky foundations of many statistical conclusions, forced me to rethink my profession.

Awards

Laureate of the Diamond Grant award from Ministry of Science and Higher Education, Poland

2018-2021

I was a laureate of the 7th edition of the Diamond Grant programme. Diamond Grants are scholarships for outstanding students-researchers in Poland.

Laureate of the "The Best of The Best! 3.0" scholarship from Ministry of Science and Higher Education, Poland

2018 - 2019

I won the "The Best of The Best! 3.0" scholarship. It allowed me to conduct research on statistical practices in psychological science and show my work during a 31st Annual Convention of Psychological Science in Washington, D.C.

Scholarship of Minister of Science and Higher Education in Poland from Ministry of Science and Higher Education, Poland

2018

Scholarship for outstanding achievements awarded to students.
